

## Focus on

### New First Steps

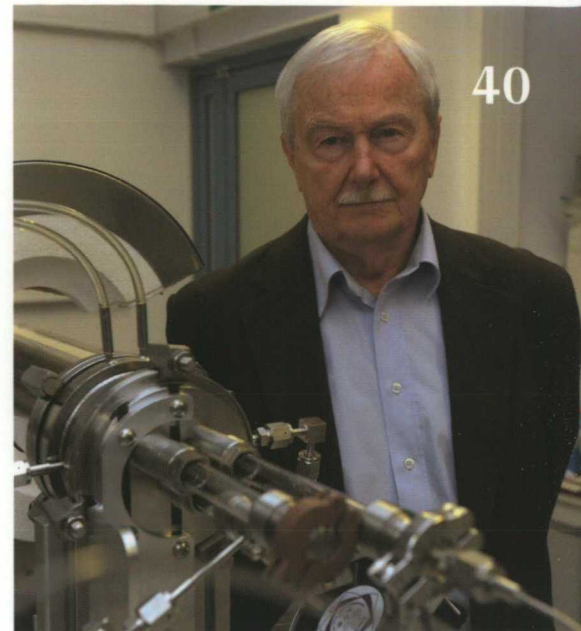

We have managed to regenerate functional continuity in a previously severed spinal cord, successfully managing to apply results achieved in basic research, and on small animals, to a human patient – we are told by Dr. Wojciech Fortuna

## Focus on

### If I Had a Hammer...

We are currently the most advanced center in the world constructing these specialized devices. We were the first to develop a hammering system sent on a mission to a comet – Dr. Jerzy Grygorczuk points out

## Briefly Speaking

### On Blue Diodes

What's even more important than our scientific achievements is that the applications of our research and the experiences gained by the companies Ammono and TopGaN are increasingly likely to be widely implemented in the Polish economy – says Prof. Sylwester Porowski
